Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 7-13 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. In particular, these claims do not further limit the glow plug, but are instead drawn to a vehicle.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Murai et al (US Patent No. 6411038).

4. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 1 096 141.

5. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Shinji (JP 2002-339793).

Art Unit: 3747

6. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 59-060237.

Claim Rejections - 35 USC § 103

7. Claims 7-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over anyone one of Murai et al, EP 1096141, Shinji or JP 59-060237. Each of these references teaches a glow plug having a pressure sensor, however, they appear to be silent regarding whether they are used in a vehicle. It is well known that glow plugs are typically used in diesel type engines and these engines are well known to be used in vehicles, such as trucks, buses, etc. It would have been obvious to one of ordinary skill in the art to have used each of these glow plugs in a vehicle having a diesel engine since it would have provided for a compact way of pre-heating the engine cylinders and sensing combustion pressure.
